# A BILL FOR AN ACT

RELATING TO PHARMACISTS PRESCRIBING AND DISPENSING OF OPIOID  
ANTAGONIST.

**BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:**

1           SECTION 1. During the 2018 legislative session, the  
2 legislature addressed the nationwide opioid epidemic by  
3 authorizing pharmacists, who received the appropriate education  
4 and training, to prescribe and dispense opioid antagonist to  
5 patients who are at risk for an opioid overdose or family member  
6 or caregiver of an individual at risk for an opioid overdose.

7           The legislature found that pharmacists are well situated to  
8 provide education and access to opioid antagonists to assist  
9 with the prevention of addressing opioid overdoses in Hawaii.

10           Accordingly, the purpose of this Act is to clarify the name  
11 on the prescription for the opioid antagonist, whether it is the  
12 individual who is at risk for an opioid overdose or the name of  
13 the family member or caregiver of an individual who is at risk  
14 for an opioid overdose who is requesting the opioid antagonist.

15           SECTION 2. Section 461-11.8, Hawaii Revised Statutes, is  
16 amended to read as follows:

1 " [†] §461-11.8 [†] Opioid antagonist; authority to prescribe  
2 and dispense; requirements. (a) A pharmacist may prescribe and  
3 dispense an opioid antagonist to an individual who is at risk  
4 for an opioid overdose or a family member or caregiver of an  
5 individual who is at risk of an opioid overdose regardless of  
6 whether the individual has evidence of a previous prescription  
7 for an opioid antagonist from a practitioner authorized to  
8 prescribe opioids. The opioid antagonist prescribed and  
9 dispensed for a family member or caregiver of an individual who  
10 is at risk for an opioid overdose may be prescribed and  
11 dispensed in the name of the individual who is to be treated  
12 with the opioid antagonist or in the name of the individual who  
13 is requesting the opioid antagonist, or "Opioid Antagonist  
14 Recipient" or "OAR".

15 (b) A pharmacist who prescribes and dispenses opioid  
16 antagonists pursuant to subsection (a) shall:

17 (1) Complete a training program related to prescribing  
18 opioid antagonists that is approved by the  
19 Accreditation Council for Pharmacy Education (ACPE), a  
20 curriculum-based program from an ACPE-accredited  
21 college of pharmacy, a state or local health

1 department program, or a program recognized by the  
2 board;

3 (2) Provide the individual who is receiving the opioid  
4 antagonist with information and written educational  
5 material on risk factors of opioid overdose, signs of  
6 an overdose, overdose response steps, and the use of  
7 the opioid antagonist; and

8 (3) Dispense the opioid antagonist to the individual who  
9 is at risk for an opioid overdose, family member, [~~or~~]  
10 caregiver, or individual requesting the opioid  
11 antagonist as soon as practicable after the pharmacist  
12 issues the prescription."

13 SECTION 3. Statutory material to be repealed is bracketed  
14 and stricken. New statutory material is underscored.

15 SECTION 4. This Act shall take effect upon its approval.  
16
